864.640.1157 | willcolumbia01@gmail.com | Charleston, SC

Computer Science graduate who builds working software end to end: full-stack web apps, REST APIs, search algorithms, and self-hosted containerized services. Pairs Python, C++, and SQL with hands-on systems and networking experience in production environments.

PROJECTS github.com/willcolumbia

- **Chess Teacher** — Python, Flask, JavaScript, Stockfish, Docker: web app that reviews games move by move, classifies and explains mistakes, and trains openings; tested with pytest
- **PitStop Pro** — Django, Python, SQLite: co-developed a mechanic-shop management web app (senior capstone) with scheduling, inventory, invoicing, pricing, and earnings modules, deployed on Railway
- **Server Metrics Dashboard** — Python, Flask, JavaScript: built a REST API that collects live system metrics and a web dashboard that visualizes them
- **Self-Hosted Home Server** — Docker, Linux, Nginx: run containerized services (Nextcloud, Pi-hole, game servers) behind a reverse proxy with Tailscale remote access
- **Peg Solitaire Solver** — Python: wrote a recursive backtracking solver that finds a step-by-step solution for triangular boards of any size from any starting hole

EXPERIENCE

IT TECHNICIAN I
Wild Dunes Resort | Charleston, SC
2026 – PRESENT

- Diagnosed payment failures by tracing transactions across FreedomPay and InfoGenesis integrations to isolate store-ID mismatches
- Document and restructure configuration data for ~100 network switches, standardizing records and flagging inconsistencies
- Configure VLANs, switch ports, and access points on Aruba infrastructure; troubleshoot Windows/Linux systems
- Support PCI-DSS compliance through access control, firewall, and endpoint protection configuration

ACCOUNT MANAGER
Plus Inc. | Greenville, SC
2024 – 2025

- Redesigned Salesforce reports and dashboards for pipeline, forecast, and ROI data; format was adopted as the company standard
- Sourced and closed an average of $252,000 per year in hardware and SaaS deals, translating client needs into technical solutions

TEACHING ASSISTANT, COMPUTER SCIENCE
University of South Carolina | Columbia, SC
2022 – 2024

- Guided students through programming assignments and debugging in Python and C++
- Contributed to a 20% improvement in department pass rates through targeted student support

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE
University of South Carolina
AUGUST 2020 – MAY 2024

Relevant coursework: Data Structures & Algorithms, Database Systems, Data Mining, Statistics

SKILLS

- **Languages:** Python, C++, SQL, R, JavaScript
- **Frameworks:** Flask, Django, pandas, NumPy
- **Testing:** pytest, unit and integration tests
- **Infrastructure:** Docker, Linux, Nginx, Railway
- **Web:** HTML/CSS, REST APIs, Git/GitHub
- **Systems:** Windows Server, networking, PCI-DSS
